

## Fairless Landfill Operations Update

(June 2021)

- The Landfill Gas Compressor Station expansion was completed May 21st. This will allow the facility to increase the landfill gas flow from the landfill.
- The cell 9 project, which consists of 17 acres, has its' complete liner system. The team anticipates certification by the end of June.
- The new sump area for the primary liner in Cell 9 has been completed.
- At the WHC Conference Awards Presentations in June, our Landscape, Pollinator and Awareness and Community Engagement projects received highest honors for programs in wildlife habitat enhancement, pollinator protection and conservation education. These awards are very competitive and based on points scored on certification applications. The WHC Project Awards are given to the highest-scoring projects in each category. You can view the Pollinator and Awareness and Community Engagement Awards presentation [here](#) (at the 8 minute and 12:53 minute marks). The Landscape Awards can be found at <https://youtu.be/8uUCsqV2ZZ0> (at 5:57 mark).
- On June 24<sup>th</sup> from 5-7pm, our community partner Dan Burke will be educating anyone who would like to join our event on the importance of bees.

As we continue to make progress on these on these projects and more, our team will be posting them on our website ([fairlesslandfill.com](http://fairlesslandfill.com)).

For information regarding our facility and events, please visit our Facebook page. ([www.facebook.com/fairlesslandfill](http://www.facebook.com/fairlesslandfill) )

Please feel free to reach out to me directly with any questions or concerns at 215-768-4051.

Sincerely,

Bobby Jones

Sr. District Manager
